**SECTION VI - TOXICOLOGICAL PROPERTIES**

<b>Carcinogenicity:</b>	NTP: No	OSHA Regulated: No	IARC Monographs: No
<b>Routes of Entry:</b>	Skin: No	Inhalation: low health risk	Ingestion: No
<b>Threshold Limit Value:</b>	None Established. See Section VI.		
<p>Treat as a nuisance dust. Typical free silica crystalline (quartz) content is less than 0.10%. Human toxic response has not been demonstrated for any route of entry. Mechanical irritation may occur to eyes, skin, or respiratory tract. Pre-existing health conditions may be aggravated. Pneumonconiosis may be possible from chronic over exposure. Contains less than 0.10 - 0.30% Nickel. The International Agency for Research on Cancer (IARC) (Vol 49) has determined that elemental nickel is possibly carcinogenic to humans (group 2B) and the National Toxicological Program (NTP) has determined that elemental nickel may reasonably be anticipated to be a carcinogen.</p> <p>Under WHIMS legislation any product containing 0.10% or more of a "known carcinogen" must be divulged for hazard communication purposes. This is not an assessment of risks. It is believed that if the PEL is not exceeded and recommended best practices and precautions are followed that this product will not be a health hazard.</p>			

<p>Group 2B Carcinogen: Possibly carcinogenic to humans - One set of criteria used in this category is when there is insufficient evidence for carcinogenicity in humans and limited or sufficient evidence in experimental animals.</p>	
<b>Effects of Overexposure:</b>	<p>Short Term: No effect other than as a nuisance dust.</p> <p>Long Term: As with any nuisance dust, long-term exposure to dust concentrations higher than recommended Permissible Exposure Limit (PEL) may cause delayed lung injury.</p>

**SECTION VII - PREVENTATIVE MEASURES & PRECAUTIONS FOR SAFE HANDLING & USE**

Steps to be taken in case material is released or spilled:	No special procedures required for clean-up. Wetting with water will reduce airborne dust.
Waste Disposal Method:	If uncontaminated this product may be disposed of as an inert non-hazardous material in an appropriate solid waste landfill according to applicable Federal, State/Provincial and Local Regulations.
Other Precautions:	If material is used for abrasives, equipment used must be frequently inspected to ensure timely replacement. Avoid creation of respirable dust.
Respiratory Protection:	Use appropriate NIOSH certified respiratory protection, as required by OSHA for exposure above PEL.
Ventilation:	Keep dust level below PEL. Maintain sufficient ventilation to allow visual contact with work surfaces.
Eye Protection:	Hood with protective lenses and or safety glasses.
Protective Gloves:	Standard abrasive blaster's gloves.
Other Protective Equipment:	Use appropriate abrasive blasting protective equipment.
Work Hygiene Practices:	Thoroughly wash hands and face prior to eating or smoking.
Other Precautions:	Keep dry and free of all contamination to assure free flow. Use an appropriate safety screen over fill hatch of blasting pot. Respirable dust may be generated during pressure abrasive cleaning operations.

**SECTION VIII - FIRST AID & EMERGENCY MEASURES**

Eye Contact:	Immediately flush eyes thoroughly with water or an ophthalmic saline solution.
Skin Contact:	Wash skin with cold water & soap if irritation occurs.
Inhalation:	Remove affected person(s) to fresh air source.
Oral Intake:	Rinse mouth out with water.
<i>If symptoms persist, contact a physician or other medical personnel.</i>
